

## ADVOCATES LOAN TO CHECK REVOLT

Poland, Austria and Armenia Must Have \$125,000,000, Says Glass.

### THOUSANDS ARE HUNGRY

British, Canadians and Argentinians Willing to Cooperate in Plan to Supply Food.

Special Despatch to The Sun. WASHINGTON, Jan. 29.—The United States must loan Poland, Austria and Armenia at least \$125,000,000 for the purchase of foodstuffs in this country if the starvation of thousands of men, women and children is to be checked and a complete overthrow of the order of governments in these sections is to be checked, Carter Glass, Secretary of the Treasury, today told the House Ways and Means Committee.

The figure given by Mr. Glass is a reduction of \$2,500,000 from the previous estimate submitted, made possible, he said, through assurance from the British, Canadian and Argentine Governments of their willingness to cooperate in the programme and the probability that private charities will aid. Smaller sums will not prevent the catastrophe that threatens these countries, Mr. Glass said. This conclusion was reached last night at a conference with Herbert Hoover.

Although admitting the sum of \$50,000,000, to which amount several committee members wanted to cut the authorization, would help some, Mr. Glass said it was his opinion that this amount would be insufficient to prevent an overthrow of the order of governments in these countries, with the result that the loan would be a total loss, whereas if a larger amount of food were sent conditions would be improved and the ultimate loss would be negligible.

The programme formulated by Mr. Hoover calls for the sending of 1,000,000 barrels of flour to the famine stricken countries.

The Secretary gave a most appalling picture of conditions in Austria, "by the reports of conditions in Austria recently given to me by a man in authority. Men, women and children are dying by the thousands. One man who recently returned told me that within two blocks he counted thirty-seven dead bodies. Children are growing up in a state of deformity pitiful to behold. The conditions shock the human conceptions of misery. Those who survive are too weak to bury the dead. Unless aid is given it may result in general uprisings and the overthrow of orderly governments in those countries. I cannot too strongly urge prompt action in this matter. It is not only the humanitarian but the safe thing to do. It will be bread cast upon the waters. It will be a plain, practical, safe investment if we do not get a dollar back.

This programme does not involve additional appropriations, because the profits and the \$1,000,000,000 fund of the grain corporation can be used. The money already has been provided in the existing system of taxation, Mr. Hoover has suggested to me that four in the

## Hoover's Food Warrants for Starving Europe

devised to make it easy and certain to get food at once to hungry friends or relatives in Europe.

If you wish to furnish \$10 or \$50 worth of food to any one in the famine districts, buy a Warrant at the office of the Title Guarantee and Trust Company. Mail it to your friend in Europe. He presents it at one of the American Relief Administration's foreign depots and gets the food.

These depots are in Prague, Warsaw, Budapest, Vienna and Hamburg. The food has already been sent there. Its transfer to any one you wish to help is made immediately and without trouble and with no risk of loss of property or time.

This simple plan is another great tribute to Hoover's genius and capacity to do things. We are glad to help carry out this plan and put the services of the Company at the command of all our clients, and particularly the foreign born, who are so much concerned about their relatives in the old country.

Warrants can be bought at all of our offices and the simple workings of the plan explained to any one interested.

## SENATE DEFENDS "PORK" BILL

Action of House in Refusing Money for Waterways Denounced.

WASHINGTON, Jan. 29.—Sharp denunciation of the action of the House in cutting down the rivers and harbors act set aside an appropriation of \$4,000,000 for the relief work and Canada probably will send \$10,000,000 to \$15,000,000 worth of flour, he said.

Mr. Glass emphasized that the Treasury has made every effort to reduce governmental expenditures to the last possible minimum. "We cannot pervert the war time necessity of dealing in billions," he said, "and no one hopes more than the Treasury Department officials that the Government will soon be back to the million dollar basis of peace times. But we cannot turn our backs on thousands of starving people while we have a surplus of food supplies."

## ARMY BILL NEARS COMPLETION

House Committee Not Yet Agreed on Universal Training.

WASHINGTON, Jan. 29.—Agreement reached today by the House Military Committee on almost all principles of army reorganization except that dealing with universal military training.

Provision was made for an army air service despite the movement for a unified Government air control. Provision also was made for maintenance of the chemical warfare service as a separate corps for experimental purposes, and for the construction and transportation corps, these to be a part of the Quartermaster Department. It was decided not to have a separate chaplain corps, but to provide one chaplain for each 1,200 enlisted men.

The committee decided to leave the details of army organization to the discretion of the War Department.

## HOUSE CAN'T HELP IN PAPER SHORTAGE

Committee Drops Various Plans Suggested for Relieving Newspaper Situation.

### NO CANADIAN EMBARGO

Reserve Down to Four Days Supply—Voluntary Conservation Urged.

Special Despatch to The Sun. WASHINGTON, Jan. 29.—No legislation yet proposed is feasible to relieve the present print paper shortage, the House Ways and Means Committee decided today in dropping consideration of various proposals to that end.

Consumption of print paper still is considerably ahead of production reports submitted by the Federal Trade Commission showed, but the committee came to the conclusion that the remedy lies in real voluntary conservation by newspaper publishers in such a manner that the smaller dailies can obtain needed supplies.

The meeting of the committee today was called to discuss the reported Canadian embargo on the export of print paper, but information submitted by the State Department showed that no such step ever was taken by the Dominion Government. The Canadian Government still requires all paper mills to allot part of their production for the Dominion press, and the only embargo ordered was on the shipments of Port Francis, Manitoba, mill, which refused to allot more than its quota for domestic consumption on the order of the Canadian Paper Controller. This individual embargo since has been lifted, however, the Controller was informed.

Chairman Fordney of the committee declared Congress has not the power to limit the size of newspapers. "If it does," he said, "we have the power to regulate the length of men's trousers and the size of a loaf of bread. If there is no Canadian embargo we can do nothing."

William B. Colver of the Federal Trade Commission told the committee that the consumption of print paper has increased 24 per cent. in the last year, while production is only 14 per cent. greater.

The supply that the mills now have on hand is sufficient to last only four days should these plants suddenly be stopped," he said. "The present stocks are lower than at any time in ten years. The amount on hand at the mills December 31, 1919, was only 15,359 tons, compared with 38,998 tons January 1, 1917. The consumption by papers of more than 5,000 daily circulation in 1919 was 1,222,892 tons, while last year it increased to 1,705,091 tons and, although the 1919 production was the greatest in history, it did not keep pace with the demand. Exports from this country are small. I do not believe Congress can relieve the situation by legislation. The real remedy lies in the voluntary reduction of Sunday papers and other large editions. Publishers have agreed to do this but so far little conservation has been accomplished."

"The excess profits tax is at the seat of the present shortage because of the fact that business has turned to creating its profits through advertising."

## GERMAN SHIPS' SALE DELAYED.

Action on Bids for Thirty Vessels May Be Taken Monday.

WASHINGTON, Jan. 29.—No bids for the thirty former German passenger liners offered for sale by the Shipping Board have been accepted as yet, Chairman Payne said today, and the necessity for further consideration of the proposals received probably will delay any action until Monday.

Among the companies submitting bids for the liners were the International Mercantile Marine, J. Ellwell & Co., the American Ship and Commerce Corporation, the Munson Steamship Company, the Oriental Steamship Company and the Compagnie Generale Transatlantique.

Pierce-Arrow trucks are still running after 8 years. Even if their service were now ended, each would have cost less than \$600 a year depreciation.

It will pay to buy durability. Time is the biggest expense item in truck operation. Durability means operating a long time and all the time—minimum time lost on the road or in the shop.

No. 2 the first Pierce-Arrow truck marketed is used by the International Brewing Company of Buffalo for keg deliveries between Buffalo and neighboring towns.

To demonstrate the practicability of the worm gear, then new, it ran fully loaded over the road from New York to Boston on May 28th, 1911, in 20 hours. After 7 years' commercial use, it repeated this run in 18 hours and 7 minutes, carrying the same load. Its fame has spread throughout the country.

It has traveled in 8 years 160,000 miles.
